

THERMAL GLIDE PATIO DOORS FOR EVERY DECOR.

Everything You Want In A Patio Door...And More.

Our patio door offers effortless operation.

A patio door should be one of the most inviting parts of your home. It will be, if you choose Thermal Glide. Our patio doors will help you express your lifestyle best, because they are as durable, energy efficient, and maintenance-free as can be.

We offer five standard door sizes and also make custom doors to meet your specifications. Our standard nine foot wide patio door, shown above, will beautify any home.

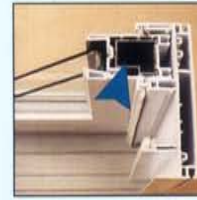

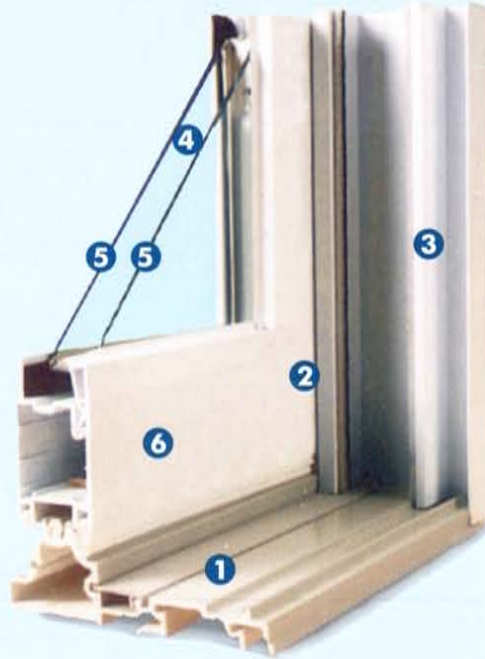

Choose your preference of right-hand or left-hand operating lites, viewed from outside the door.
(*"O"*= operating lites. *"F"*= fixed lites.)

Thermal Glide...Quality From Top To Bottom And Side To Side!

1. **Heavy duty Fiberglass pultruded sill.** Durable enough to bear heavy foot traffic anywhere along the sill.
2. **Fusion-welded metal reinforced sash.** Provides structural integrity. Eliminates drafts.
3. **Multi-chambered, hollow core, welded main frame.** Provides superior strength.
4. **7/8" insulated glass.** Provides maximum energy efficiency. **Mini-blinds are available between 1" insulated glass.**
5. **Tempered glass.** Shatters into dull rather than dangerous, sharp pieces of glass.
6. **Lead-free, virgin PVC vinyl.** Our vinyl stands up to the weather, wherever you live, for a lifetime.
 - **Interlocking panels.** Prevent separation when door is closed.
 - **Easy rolling extruded screen.** Made for ease of operation.
 - **Locking mechanism on screen door.** Provides added protection.
 - **Optional regular, contoured, and brass grids in Colonial or diamond patterns.** Decorative accents to match any decor.
 - **ClimaGuard Low-E.** For increased weather-resistance.

- **Optional bevel-etched glass grids in Cathedral, Florentine, Double Prairie, Colonial or Diamond patterns.** Decorative accents to match any decor.
- **Bevel-etched grid patterns available with frosted or polished-etched look.** Frosted-etching is more visible inside and out. Polished-etching is more subtle.

Metal reinforced sash provides structural strength.

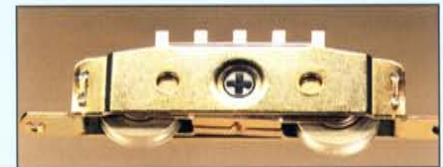

Optional heavy-duty vent lock/dead bolt provides three benefits.

- 1) In the vent position the bolt keeps the door partially open to let in fresh air.
- 2) In the closed position the bolt provides a secondary lock.
- 3) The spring-loaded bolt quickly unlocks with the press of a button.

Heavy-duty extruded aluminum screen door is stronger than conventional roll form screen doors.

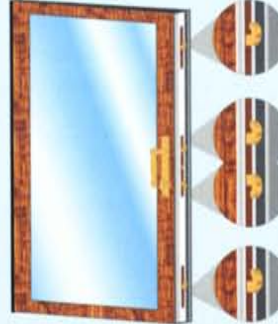

Our patio door glides on four heavy-duty brass rollers which provide long-lasting, trouble-free operation. The rollers are easy to adjust from the outside.

Door Handle Options

- 1) Standard Wood handle has optional key lock.
- 2) Optional Legacy Solid Brass handle comes standard with key lock.
- 3) Optional Deluxe Brass Handle with 4-point locking system comes standard with key lock.

Our Deluxe Brass handle provides four times the security by locking the door in four locations... top, middle and bottom of the jamb.

You'll have more peace of mind with the added security provided by the Deluxe Brass handle with 4-point locking system.
